Semi brick- Cause: Usually a wrong region update - Symptoms: System menu works, but when going to the Settings, you get an error.. Put the wad in the Wad folder on the SD card2 Launch the Homebrew Channel3 Run the wad manager and install the system menu WadError 003- Cause: Korean region changed wii, updated to 4.. Full brick- Cause: uninstalling (c)IOS or system menu, or theme/banner brick - Symptoms: Will not load system menu.. 2 Once you get the error, there is no way (yet) to restore from it (since BootMii as boot2 gets overwritten as well!).

Some bricks cannot be restored if you don't have preloader or bootmii as boot2 installed, so watch out!- Cause: malformed banner.. It only occurs when a Korean region changed Wii (a wii that was originally Korean) updates to 4.. 2- Symptoms: Black screen with 'Error: 003, Unauthorized device Detected' at boot.. Boot into preloader or Bootmii2 Launch the Homebrew Channel3 Run the AnyTitle Deleter and uninstall the bad wad that causes the brickTheme brick- Cause: Installing bad theme (one that is not for your Region/Version).. 2 Copy the wads of each folder to the wad folder on the SD card (empty the folder if it exists already)3.. Wii BricksIf you are not careful enough, you can brick your Wii Depending on the kind of brick, we need to use different methods to unbrick the Wii.. Maintenance mode fails Required:* NUS Downloader* Wad manager (or YAWMM)* Preloader/Bootmii as boot2 (note: priiloader will only work if you set it to use another IOS than the removed one before the brick!)Guide:1.. Boot into preloader or Bootmii3 Launch the Homebrew Channel4 Run the wad manager, let it use IOS36 (or 249) if it asks and install the system menu Wad. 34bbb28f04 [Download Itube Studio For Mac](#)
